

MDB-DILUTER PRO

ENVIRONMENTAL DILUTER SYSTEM

The MDB-Diluter is a free-standing filtration system that prevents accumulation of welding fume by continuous filtration of polluted air. The system consists of a filter unit, a fan in a sound-absorbing box, an outlet unit with adjustable outlet nozzles and a silencer. The MDB-Diluter is supplied with intelligent control equipment ControlPro. The fan speed is pressure controlled by a frequency inverter.

The filter unit is provided with a spark arrester and filter cartridges. It contains the RamAir™ pulse amplifier for automatic filter cleaning. The dust and dirt particles end up in the dustbin underneath.

APPLICATIONS

The MDB-Diluter is intended to be used for the following applications:

- MIG-MAG/GMAW welding
- TIG welding
- FCAW welding
- stick/MMAW welding
- (very) heavy dust load
