

REC

RUBBER NOZZLE WITH SPRING CLIP

The REC is designed to take in ambient cooling air thereby reducing the exhaust emission temperature. Recommended for today's trucks, private cars and especially vehicles with twin exhaust pipes.

The nozzle is composed of moulded, high temperature resistant rubber. The REC is also equipped with an inner spring clip in order to strengthen the connection with the exhaust pipe. The nozzle also includes a CO-outlet for measuring emission values.

The REC is also available with a manual on/off damper for flow control (REC-D versions).

APPLICATIONS

The REC is intended to be used for the following applications:

- To eliminate hazardous vehicle exhaust emissions with our vehicle exhaust capture and removal systems for the following segments: fire and emergency service stations as well as military facilities.

SPECIFICATIONS

■ Physical dimensions and properties	
Material	<ul style="list-style-type: none"> elbow grabber
	<ul style="list-style-type: none"> steel EPDM rubber
Color	black/aluminum
■ Ambient conditions	
Temperature resistance	350°F continuously 400°F spike
Max. relative humidity	80%
Outdoor use allowed	no
■ Where used	
Suitable for all Plymovent fixed extractors and exhaust hose reels	
■ Scope of supply	
Rubber nozzle with spring clip (optional: damper) Elbow	
■ Order information	
Article no.	see remaining specifications
Number/package	1
■ Shipping data	
Harmonized Tariff Code	84219990
