

THE UNIVERSAL EXHAUST
EXTRACTION NOZZLE

INTERNAL GRABBER®

ONE SIZE FITS ALL!

**NEW
PRODUCT**

*Patent pending

EVER WONDER ABOUT THE VALUE OF CLEAN AIR?

We do. Exposure to hazardous vehicle exhaust emissions can cause serious health problems for you and your employees. The most efficient way to combat that exposure is to capture the exhaust fumes at the source and eliminate contact with harmful pollutants.

Since 1975, Plymovent source capture systems remove the hazardous emissions at the source, providing a healthy and safe working environment. High-quality exhaust removal systems are recommended to make sure that OSHA/NIOSH exposure limits are not exceeded.

Plymovent offers various systems that capture, extract and remove gas and diesel exhaust emissions, creating a cleaner and healthier work environment for your personnel. From existing, to new facilities, our range of products and system solutions covers it all.

INTERNAL GRABBER® THE UNIVERSAL EXHAUST EXTRACTION NOZZLE

Over the years, the shapes and positions of car and truck exhaust tailpipes have evolved into a variety of configurations, including the standard horizontal discharge, flush tailpipes that exit through the vehicle bumper, and dual tailpipes. To accommodate this progression, Plymovent has developed a completely new, state-of-art nozzle that meets the demand for all of these situations.

One size fits all!

The Internal Grabber® is a universal, patented, vehicle exhaust extraction nozzle that makes other nozzles obsolete. Due to the protruding beak and ergonomic body, the Internal Grabber® nozzle is easy to attach to virtually any vehicle exhaust tailpipe.

Ergonomic....

This nozzle is an extremely ergonomic tool for all of your exhaust extraction needs. The Internal Grabber® features a hose connection point that is extremely easy to use and has a variety of adapters to allow for hoses of multiple diameters.

...and user friendly

The unique, pivoting and extendable “nozzle skirt” offers flexibility for every situation while protecting the vehicle exterior. The pump-action handle is incredibly comfortable to your hand and is easy to use. In the case of dual exhaust tailpipes, with the “butterfly receiver” you can easily connect a secondary Internal Grabber® to the first allowing a very simple way to capture fumes at the source from a dual tailpipe exhaust system.

Quick and easy storage

The Internal Grabber® includes a magnetic mountable storage “tripod” (wall bracket). With this “tripod” you will have a safe, out of the way storage option.

Source capture of hazardous vehicle exhaust fumes is essential for the safety of you, your employees and your customers.

PRODUCT FEATURES

Extendable Skirt with soft edge

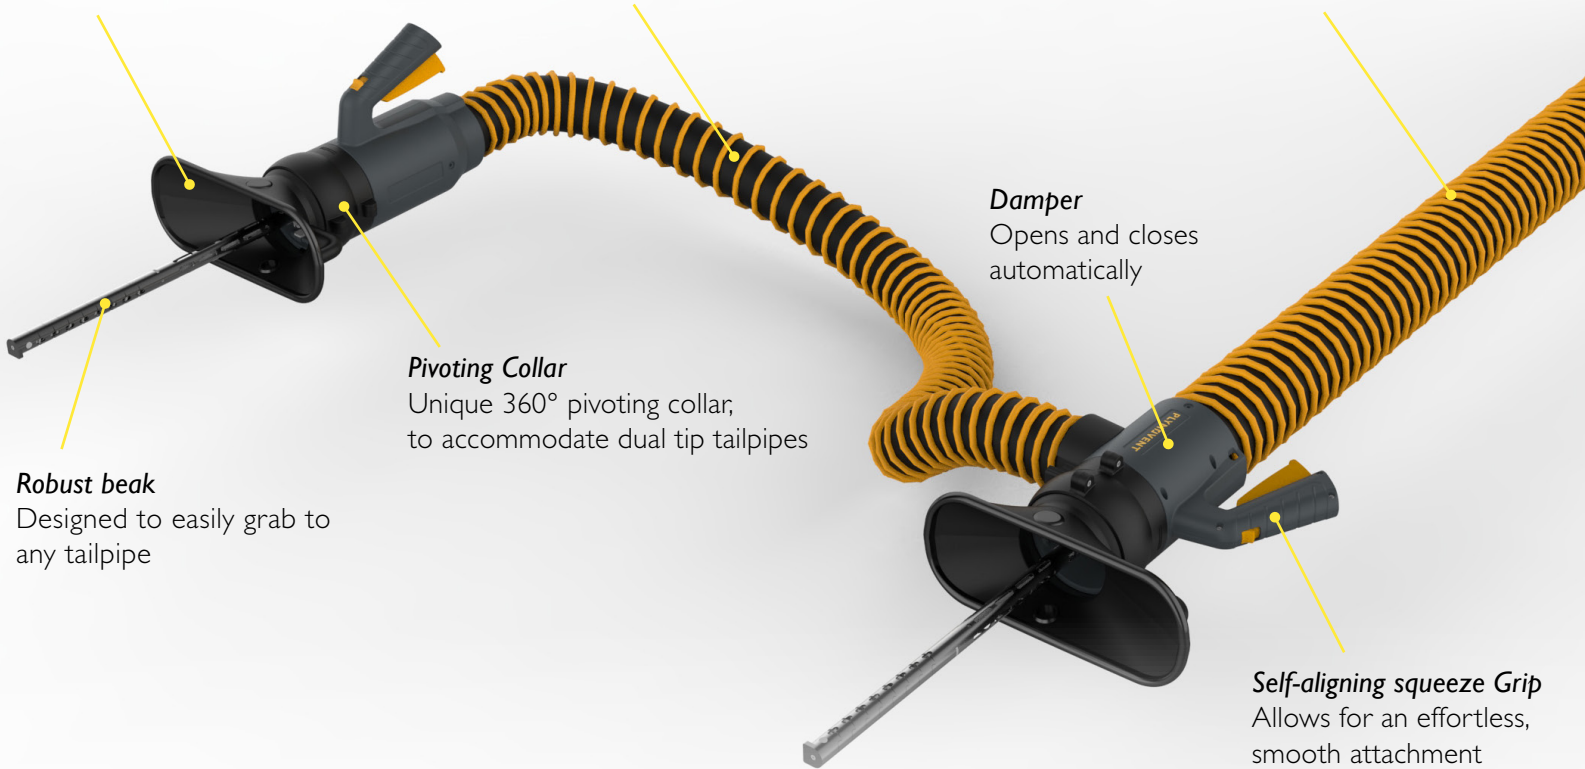

To optimize exhaust gas capture, the skirt is able to dock close to body work

Dual Exhaust Capability

A second grabber can be easily added "no tools needed" for dual tailpipe exhaust systems

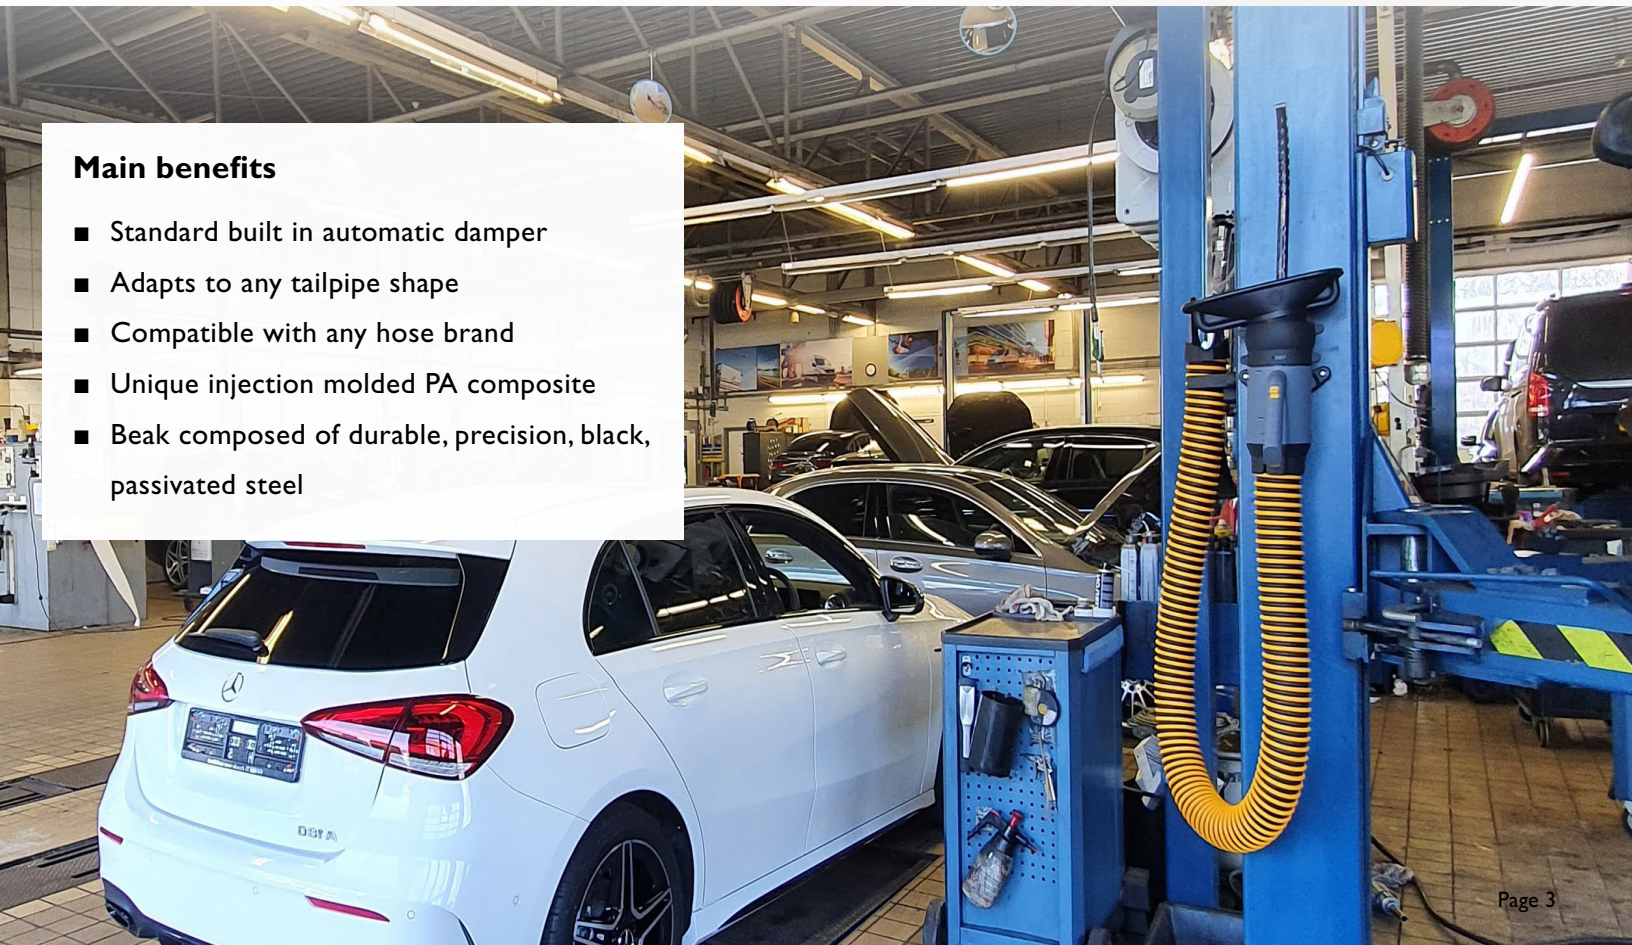

Variety of Hose Diameters

Standard hose Ø 4 inch (100 mm), available options Ø 3 inch (75 mm), Ø 5 inch (125 mm), and Ø 6 inch (150 mm)

Main benefits

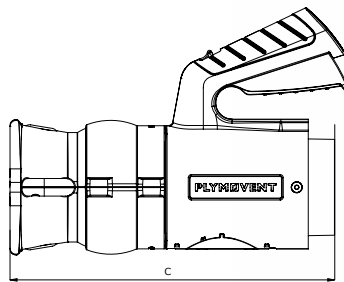

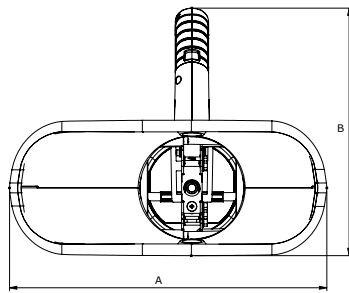

- Standard built in automatic damper
- Adapts to any tailpipe shape
- Compatible with any hose brand
- Unique injection molded PA composite
- Beak composed of durable, precision, black, passivated steel

TECHNICAL SPECIFICATIONS

Housing material	PA-6 (nylon) with 15% glass filling
Weight	6.83 lbs / 3,1 kg
Operation temperature	<ul style="list-style-type: none"> • min. 23°F / -5°C • nom. 70 °F / 21°C • max. 300°F / 149°C
Standard hose Internal Grabber	Ø 4 inch / 100 mm
Available options	<ul style="list-style-type: none"> • Ø 3 inch / 75 mm (reducer 4in > 3in) • Ø 5 inch / 125 mm (increaser 4in > 5in) • Ø 6 inch / 150 mm (increaser 4in > 6in)
Where used	All vehicles with a tailpipe of Ø 1 inch - Ø 3 inch / Ø 25 mm - Ø 75 mm

DIMENSIONS

	inch	mm
A	13	324
B	10	253
C*	13.5	346

*excl. beak
